Special symbols and features

Any win on winning line locks winning symbols in place. The other symbols are then respun again. If a new symbol is added to the current winning line or a new win is added, the

symbols are locked again and the remaining reels are respun again. This process is repeated until there are no more winnings. Only then, the winnings are calculated.

Superspin bonus game

SuperSpin bonus is a bonus depending on the number of displays spun (super spins) and containing four categories (MINI, MIDI, MAXI, SUPER). To reach the first level of SuperSpin bonus, there needs to be 6 respins after the initial spin. Number of respins is highlighted in the counter on the right side of the display. The player receives a win in the amount of the total bet multiplied by the winning factor:

# Superspin	Bonus	Factor
≤ 5	no bonus	-
6	MINI	20
7	MIDI	50
8	MAXI	150
≥ 9	SUPER	400

The number of spins that count for the SuperSpin bonus start from the first respin, the initial spin does not count. If any of four category Superspin bonus is reached, it is highlighted by a fire circle and the player is awarded with highest one reached.

WILD symbol

WILD symbol complements a winning line and has no own win factor. If five WILD symbols are gained on one winning line, they are replaced by symbols with maximum win factor.
